# Threefold ...

Governments have a threefold *responsibility for education* and its system, that is to *promote and ensure*

> *accessibility* <

> *quality* <

> *efficiency* <

in a *sustainable* manner

# Education 3D Performance Deadlock (unaltered circumstances / conditions)

*'Increased efficiency'*

*'Higher quality'*

# Hypothesis

Performance *improvement*  
along *one dimension*  
inevitably *deteriorates*  
the performance along  
one or both of the *other dimensions*,  
at least at *unaltered*  
circumstances and conditions

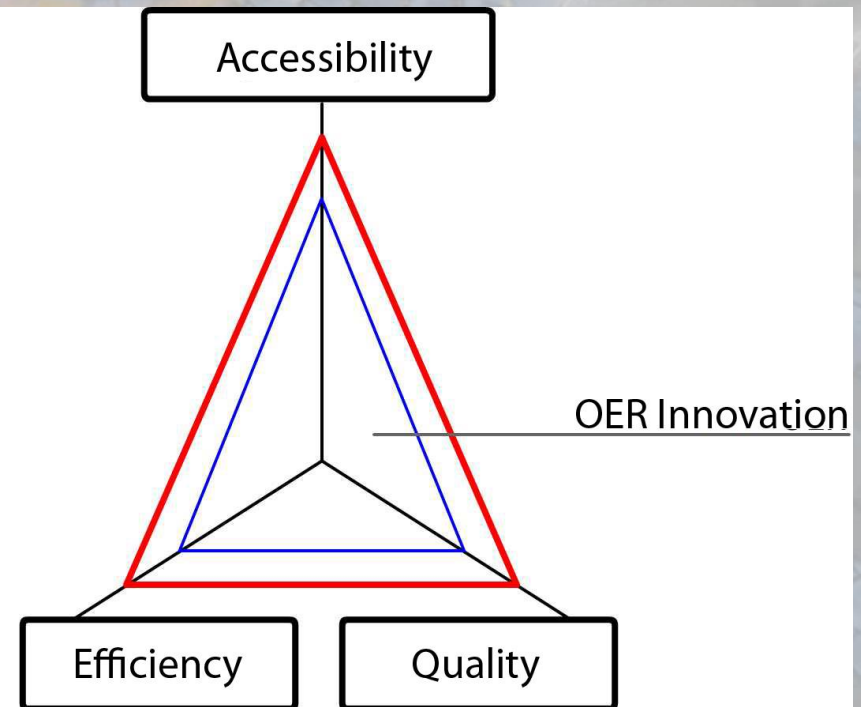

# Education 3D Performance (after an OER system intervention)

# The OER System *Intervention* ...

... *facilitates* performance *improvement* along *all three dimensions* simultaneously:

***Accessibility*** by free online availability of learning materials

***Quality*** by involvement of many experts and users in various roles

***Efficiency*** by not replicating other's efforts

... and has the features to make the educational system ***more sustainable*** than it currently is

This ***powerful 'logic'*** holds for ***OER***, ***not*** (necessarily) for ***OE*** as a whole

# No-REGRET with OER ...

According to this line-of-thought **governments** should feel encouraged to **embrace** and **mainstream OER** through an explicit governmental **OER policy** including a set of specific **OER measures**.

Within such a **context** it is **easier** and more plausible for educational **institutions** to **convert to OER** which will turn out to be a significant contribution to the **modernization** and innovation of education.
